

# Dissolvable Tobacco Products Toxicological and Physiological Effects

Brian F. Thomas, Poonam G. Pande, Kenneth H.  
Davis and Richard C. Daw  
RTI International

# Purpose

- Inform recommendations of the Tobacco Product Scientific Advisory Committee (TPSAC) regarding ...
- Identify industry documents of potential interest to the TPSAC
- *Although the work reported was done under contract with Center for Tobacco Products at FDA, the content and conclusions of this presentation are those of RTI International.*

# Topics of Interest

- Topic 5: Toxicological Effects
- Topic 7: Physiologic Effects

*Most relevant documents were shared between both topics*

# Approach

- Reviewed *all* 2730 documents submitted to FDA-CTP by tobacco companies that were stated to be relevant to the two topic areas.
- Each document was reviewed by 1 researcher in an initial screen to eliminate documents of little or no scientific value
  - Those documents that were found to contain value were reviewed by at least one additional reviewer, and the most significant information was compiled for further review and presentation.
- Additional key word searches were performed across all submitted documents as necessary.
